

DEDEEPIYA CHILAKALA

Fullstack Developer | AI/ML Engineer | UI/UX Enthusiast

Email: dedeepyachilakala@gmail.com | LinkedIn: linkedin.com/in/dedeepya-chilakala-63054b279 | Hyderabad, India

EDUCATION

Bachelor of Engineering (B.E.) in CSE (AI & ML)

Vasavi College of Engineering, Hyderabad

CGPA: 9.47 / 10

2022 - 2026

Intermediate Board Education (MPC)

Narayana College, Ongole

Percentage: 98%

2020 - 2022

Secondary School Certificate (SSC)

Montessori High School, Ongole

Percentage: 100%

2020

EXPERIENCE & INTERNSHIPS

Quant & Algo Intern | Futures First

Jan 2026 - June 2026

- Developed real-time market surveillance alerts and generated actionable trading signals from high-frequency streaming feeds for a user base of 200+ active traders.
- Engineered optimized multithreaded logic in Python to process over 10,000 market feeds per session, allowing prompt detection of sudden volatility and volume spikes.
- Automated complex data collection pipelines from financial websites using Selenium, Playwright, and REST APIs, cutting manual workloads by 95%.

Full Stack Developer Intern | Neuxa Global

May 2025 - Oct 2025

- Designed and engineered responsive user interfaces for Seller Registration Platform using React.js to streamline user onboarding workflows.
- Crafted interactive high-fidelity UI/UX design wireframes and clickable prototypes using Figma, ensuring pixel-perfect transition to frontend code.
- Built robust API endpoints and server-side file management systems for a Dynamic Portfolio Management System using Node.js, MongoDB, and Multer.

FEATURED PROJECTS

Smart Health Care System | MERN Stack, Maps API, Cloudinary, MongoDB

GitHub: github.com/dedeepya04/Smarthhealth

- Built a scalable healthcare platform using the MERN Stack to manage 100+ daily health records; integrated Cloudinary for secure document uploads, improving accessibility by 90%.
- Leveraged Google Maps API to deliver real-time hospital recommendations within a 10 km radius with 95% location accuracy.

Flipkart Reviews Sentiment Analysis | Python, NLP, Selenium, VADER NLP

GitHub: github.com/dedeepya04/Sentiment-Analysis

- Engineered a sentiment analysis pipeline for Flipkart product reviews; leveraged Selenium to scrape and process 10,000+ customer reviews programmatically.
- Applied VADER Sentiment Intensity Analyzer and custom preprocessing to classify feedback, achieving 92% confidence.

TECHNICAL SKILLS

Languages & Web:

Java, Python, JavaScript, HTML, CSS, React.js, Node.js, Express.js, REST APIs

Databases & MLOps:

MySQL, MongoDB, DBMS, Git, GitHub, Postman, VS Code

AI / ML & Core CS:

Machine Learning, Deep Learning, Neural Networks, Scikit-Learn, TensorFlow, NLP, DSA, OOPs, OS

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Elite Gold Certificate** - Programming in Java (Top 5% Candidate nationwide)
- Oracle Certified Associate** - MySQL Database Administration
- Certificate of Merit** - Academic Excellence (Highest CGPA in CSE/AI ML Department), Vasavi College of Engineering
